Portfolio: <https://mikeh138.github.io/mhenson-responsive-portfolio/>

GitHub Profile: <https://github.com/MikeH138>

Computer Science student with a passion for web development and database design. Looking to begin my career by utilizing my technical and soft skills and gain real world experience.

Education

2018 – 2021

A.S., Computer Information Systems | Tunxis Community College
Farmington, CT

- 3.19 GPA, Dean's List

Skills

HTML/CSS/JavaScript (Front End Web Development) as well as Bootstrap and other CSS frameworks

Exposure to Node.js runtime, jQuery and AJAX

Experience building applications with Visual Basic and .NET Framework

Solid understanding of SQL, data relationships, data integrity standards, and business rules

Proficient with Windows Operating Systems, Microsoft Office Suite, and file management

Familiar with System Analysis processes and development methodologies

Proficient with Git/GitHub (version control)

Fundamental knowledge of computer networking, including security standards, protocols and equipment

Projects

Weather Dashboard | HTML, CSS/Bootstrap, Javascript - 2020

This application lets the user enter a city into a search bar and see the current weather (temperature in Fahrenheit), as well as the humidity, wind speed, UV index and an icon indicating the current conditions (sunny, cloudy, rainy, snowy, etc.) for the entered location. As well, they will see the 5-Day forecast, including the temperature, humidity, and icon indicating projected conditions.

Live Project: <https://mikeh138.github.io/weather-dashboard/>

Day Planner | HTML, CSS/Bootstrap, Javascript – 2020

This is a simple day planner, made to let the user enter their hourly tasks for their 9 to 5 workday.

GitHub Repository: <https://github.com/MikeH138/day-planner>

Live Project: <https://mikeh138.github.io/day-planner/>

No Waste Kitchen | HTML, CSS/Skeleton CSS, Javascript

I teamed up with two classmates to build this application. The idea is that the app lets the user enter ingredients that they have on hand at home, and they will be shown up to 3 recipes that they can make.

GitHub Repository: <https://github.com/peter-izzo/No-Waste-Kitchen>

Live Project: <https://peter-izzo.github.io/No-Waste-Kitchen/>

Work History
